

CUSTOM CREATIONS: Nuclear Power Compliant

DMC Power was tasked with providing high quality, custom parts for a Nuclear Generation Plant project.

Due to the high profile nature of a Nuclear Generating Plant providing power, **DMC Power** was the first and only connector manufacturer tasked with creating custom parts for a unique application, due to their reputation for providing high quality, custom connectors with rapid turn-around times.

The majority of the 6" Swage bus connectors designed for this project were all new, custom parts, and were engineering and designed to meet the stringent requirements of a Nuclear Power Plant!!!

DMC Power provided site support and tool training. The installation was quick and simple, and the solution was considered a success!!!

“An Engineering Marvel”

DMC Power has the capability to manufacture custom parts to overcome any situation!
