

## Below Ground Connectors: A Superior Solution

**DMC Power** was called to provide a solution to a Major Utility. It was recently discovered that the previously installed exothermic below ground connections were not performing as advertised.

Upon further investigation, they discovered numerous quality issues with previously buried connections, which now provided an unsafe condition for both personnel and equipment.

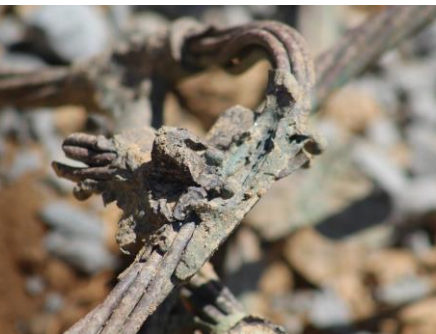

The **DMC Power** below ground connectors were chosen as the solution, due to their superior quality, reliability and longevity.

**DMC Power** provides a full range of below ground connectors to meet and exceed all your substation needs and requirements.

## SUPERIOR QUALITY

The **DMC Power** below ground connectors have been tested above and beyond the industry standards. They have been proven to **OUTLAST THE CONDUCTOR ITSELF!!!**

*Recently discovered failed exothermic connections*
